

SENSORY ART LAB

ART

WHAT

Welcome to Sensory Art! Together we learn, explore and have fun. We experiment, discover, and learn how to think out of the box. Each session focuses on development of all five senses. We see, smell, touch, listen and taste. Each class can accommodate up to eight children 3 to 10 years-old. Tikitum Sensory Lab welcomes all children of all levels of development. A session is a month long (four or five classes dependent on the month) and engages a specific sense through art and science.

WHEN

Please check the schedule.

SEPTEMBER

- Week 1 - Apple science
- Week 2 - Rain, rain, go away!
- Week 3 - Painting with.....?
- Week 4 - Smell: is it Fall yet?

Cost of one session: \$79 per child per session/ \$70 if enrolled by September 28. Sibling and referral discounts apply.

SENSORY ART LAB

Champions Program for Children with Special Needs

WHAT

Welcome to Sensory Art! Our goal is to help our children with special needs from 3 to 10 years-old to experience hands-on-learning. LAB space provides an environment that exposes children to different materials, textures, smells and sounds. We work with all five senses and allow children to explore at their own pace.

We offer opportunities to learn about nature and science through art. Our classes can be full of different textures, color and light, yet quiet and tranquil. We have worked with children who have Autism Spectrum Disorder, Sensory Processing Disorder, and ADD/ADHD.
